

Dear Senators and Representatives:

I am writing to you as a grandmother in the State of Oregon that is steadfastly opposed to HB3060! I will continue to be opposed to HB 3060 until such time that Oregon physicians, Oregon lawmakers, Oregon Health Authority and the governor of Oregon accept liability for the injuries that my Grandchildren would suffer from state-mandated vaccinations.

The following are some of the reasons why I am opposed to Oregon HB 3063:

ABOUT THE VACCINATION PROGRAM IN THE UNITED STATES

1) Vaccine science is 'unsettled'

There are scientific peer-reviewed papers that have exposed the dangers of many vaccines as well as the "herd immunity myth". And, there is documented evidence that the Center for Disease Control (CDC) has intentionally kept this information away from public health workers, physicians, legislators and the general public. [See: *Deadly Immunity* by Robert Kennedy, Jr.]

2) Harvard Study concludes "safe and effective drugs" are a myth

A 2013 Harvard Study exposed the epidemic of corruption in government institutions by Big Pharma influence and money. [See: *Institutional Corruption of Pharmaceuticals and the Myth of Safe and Effective Drugs*]

3) All participating in vaccination program are exempted from liability

Those manufacturing, ordering or administering vaccines have been granted immunity from liability should their drug cause injury, illness or even death. There is no incentive to insure vaccines are even effective, which they aren't. [See <https://youtu.be/2vPudmvzx3I>, Supreme Court of the United States. **Russell Bruesewitz et al v. Wyeth et al.** No. 09-152. Argued October 12, 2010 – Decided February 22, 2011.]

4) Patients and parents never given full disclosure

Vaccine package inserts are intentionally substituted with a sales pitch created by the CDC and the American Academy of Pediatrics that hides the truth about vaccine benefits and health risks, including seizures, denying parents/patients full disclosure.

5) CDC vaccination recommendations are not science based. The CDC has a well documented long history of unscrupulous activities.

Vaccine schedules have been established by the CDC and are promoted by public health departments, the American Academy of Pediatrics and other various organizations. CDC vaccine recommendations are not science-based as many of their reports have been altered to hide pertinent and damning information. [See former CDC scientist David Lewis' Book "Science for Sale" <https://www.simonandschuster.com/books/Science-for-Sale/David-L-Lewis/9781510743106>]

"David Lewis has been a beacon of integrity against the apocalyptic forces of ignorance and greed endeavoring to divert science from the noble pursuit of truth and pervert it into a tool that supports the most destructive policies of industry and government." —Robert F. Kennedy Jr.

6) CDC is a private for-profit corporation 'doing business'

The CDC is not a government health advocacy organization. It is a corporation listed on Dun and Bradstreet and headquartered in the STATE OF GEORGIA, with strong ties to the pharmaceutical industry. Therefore, their recommendations are influenced by the 'fiscal' health of their corporation.

7) State public health institutions are private for-profit corporations ‘doing business’

Physician or institutional records are frequently reviewed by the STATE public health department, which is also a for-profit corporation listed on Dun and Bradstreet, who receives monetary compensation from the CDC to perform this function. Therefore, the state public health department’s recommendations and actions are influenced by the ‘fiscal’ health of their own corporation.

8) American Academy of Pediatrics is a private for-profit corporation ‘doing business’

The AMERICAN ACADEMY OF PEDIATRICS and the AMERICAN ACADEMY OF FAMILY PHYSICIANS are not health advocacy organizations. They are trade associations-corporations (listed on Dun and Bradstreet) that are head-quartered in the STATE OF ILLINOIS and the STATE OF KANSAS respectively, whose monetary compensation from the vaccine manufacturers contributes to the ‘fiscal’ health of their corporations.

9) Physicians get more money for each ‘fully vaccinated’ child

Physicians (who are intentionally misinformed by the CDC and Big Pharma and who cannot be sued for vaccine injuries) are paid higher reimbursement rates for each “fully vaccinated” child.

10) Profits, not science, motivate vaccine mandates

LEGISLATORS that have passed corporate statutes mandating certain vaccines for attendance in educational institutions: As the LEGISLATORS have no medical training and can easily be influenced by drug company lobbyists and or the CDC, INC, their statutes are not scientifically motivated.

“ The vaccine industry has corrupted government policy. It’s about time lawmakers say “no” to drug company lobbyists and “yes” to informed consent”

[See retired pharmacist and lobbyist Kristine Severyn’s “ Profits not science motivate vaccine mandates “ <https://www.wellbeingjournal.com/profits-not-science-motivate-vaccine-mandates/>]

PLEASE DO NOT Support HB 3060!

Sincerely,

Karen Crutcher
