

Hello Representatives,

I fully oppose the entire HB3063, however, if you must continue on with it, please consider some amendments. I fully believe education with materials from independent (no vested interested, especially financial) sources can help the public make informed decisions regarding vaccines. An acceptable amendment would be to require more education modules before a religious or philosophical exemption is granted. This preserves civil liberties, religious freedom, and public health.

Also, I highly suggest submitting a bill like this recent one in WA:

https://app.leg.wa.gov/billsummary?BillNumber=8012&Year=2019&initiative&fbclid=IwAR3dEJ_3Jo3dvlYYONjQesrgUSi0gGL4XSTPRiaiHK7e7gz-dZSzpvcf6H4

The screenshot shows a mobile application interface for the Washington State Legislature. At the top, the status bar shows 'Verizon' and '8:06 PM'. Below that, the app's header includes the Washington State Legislature logo and a search icon. The main content area displays 'Bill Information > SJM 8012'. There is a search bar with the text '8012' and buttons for 'Bill' and 'Initiative'. Below the search bar, there is a dropdown menu set to '2019-2020' and a 'Search' button. The bill title is 'SJM 8012 - 2019-20' with a subtitle: 'Requesting that Congress allow design defect claims against vaccine manufacturers by individuals who have experienced adverse side effects caused by vaccines.' The sponsors listed are 'Randall, Lovelett, Nguyen, Short, Rolfes, Palumbo, Cleveland, Saldaña, Billig, Keiser'. At the bottom, there are four interactive buttons: 'Comment on this bill', 'Get Email Notifications', 'RSS Notifications', and 'Bill Status-at-a-Glance'.

Thank you,
Jennifer Burkart
