Im writing in favor of passage of HB2020. We must have the courage and resolve to clean up our act and preserve resources to sustain the lives that come after ours! They are already here, in schools. What can we say for ourselves if we continue to make their future more and more difficult. We do not have deniability on this issue, we know who made this mess. Cap trade and invest is a start of real effort to be a responsible community. As we go forward we will have more approaches and cooperation, but we must begin. No alternative facts will serve when it becomes hard to breathe...
