

Please pass the bill to make Krabbes a mandatory test o newborns. We had a great-great nephew, Dylan Emery, in South Carolina pass away from this horrible disease!! He was 11 months, 11 days old when he passed. He suffered for over seven months. There is a also a bill being worked on in South Carolina. If he had had this test at birth, they may have been able to help this precious baby boy!! I am following Emmett's story and pray that the legislature will take action and pass this bill ASAP. Thank you! Theone Goldman
