

Hello-

My name is Linda Webb and I support this bill. Please add Krabbe to Newborn Screening in Oregon.

I will never forget the day my dear friend, Susan Monaco, shared with me that her 18 month-old grandson was showing signs of "failure to thrive". It was simply a matter of months before their family learned that little Emmett was diagnosed with a rare disease that will eventually take his life. This family also learned that a simple, inexpensive test could have saved his life, had it been administered in a timely fashion. This heartbreaking news should never have to be heard by another family.

I am so proud of Joseph and Nikki Monaco for taking their sorrow and using it in such a powerful way. Please pass this bill, and thank you for allowing me to help.

Linda Webb
