

I oppose this Bill because it is weighted heavily in favor of Developers and their Lobbyists to the disadvantage of most Portlanders. I have lived here in Portland for the last forty years. I am in favor of regulation especially with housing. There are no protections in this bill for the most vulnerable. People are going to be displaced. The Houseless population is already out of control and this bill will add to that problem not improve it.

There has been a problem with the public involvement in the process . Please do not allow this bill to pass without real public involvement from real housing advocacy groups and individuals.
