

Hello,

I'm writing to express my support for bill SB 638 as I strongly believe that all domesticated animals should be given the opportunity to be adopted out to homes after any scientific research they may have been involved in. It is the only humane option to allow them the chance of quality of life.

As an Oregon based pet based professional I feel confident that people would be very interested in adopting these animals, and helping rehab them so they can live happy lives.

Thank you,

--
