

Dear Representatives of the Oregon Legislature,

Please vote **YES** to **Bill SB 283**:

Bill Title: Relating to exposure to radiation in schools in this state; declaring an emergency.

Catchline/Summary: Directs Department of Education to prepare and make available statement that discloses potential health risks of exposure to radiation in public and private schools to distribute statement to employees, students and parents or guardians of children. Requires department to adopt by rule guidelines for including in school curricula, assemblies, open houses and other public settings information concerning hazards of exposure to microwave radiation and how to use wireless devices. Requires Department of Education and Oregon Health Authority to conduct review of peer-reviewed, independently funded studies of effects of exposure to radiation in similar environments, particularly exposure that results from use of wireless network technologies, to identify best practices and alternative technologies that would eliminate students' exposure to harmful microwave radiation. Requires recommendations to interim committee of Legislative Assembly related to education not later than September 15, 2019, for passage.

Please vote to support the health and safety of our children.

Attached is a list of peer-reviewed scientific studies which showed the negative health effects resulting from WiFi-specific frequency (2.45 Ghz / 2450 Mhz) for your reference. We should not subject the children in this state to these health risks. Internet connection can be achieved with Ethernet cables without the same risk of WiFi radiation.

Sincerely,
Michelle Khong
