

I am writing in support of SB283.

I have been skeptical of claims that wireless radiation is a harm. I have believed the radiation emitted is minute. I have fallen for the claim that it is no more than a day in the sunshine. I did, however, begin to get sick working as an interpreter in hospitals, where there are hundreds of signals coming and going. Then, I read the studies, saw the statistics. But still....I was unprepared to believe so much damage was known to follow, and no one would stop it.

I will tell you when I finally realized something very big and very bad was on the horizon. Insurance companies will not sell coverage for damage to human beings due to EMF.

I don't know what it will take to stop and make absolutely sure we are not harming our children, but this is the last off-ramp on the road to a brain-damaged youth.

I urge you to please support SB283.

Sincerely,  
Flora Sussely  
Portland, Oregon
