**Subject:** NO on SB103 and SB104

Dear Chair Dembrow,

I am Cully Stafford of Prineville, OR. We are farmers, ranchers and foresters. Please vote NO on SB103 and SB104.

This bill is a threat to the operations who are good stewards of the land. More often than not, farmers are closer and care more about the land than those in cities. It's not the size that matters, it's the stewardship that matters.

Farms protect the environment and habitats from being developed away from their natural state forever more. Farms also provide care for the land that the government would otherwise have to pay for.

Dairy farmers have always been some of the most hardest working people, more so than other farmers. They love what they do and they care for their animals or land, if they didnt, it wouldn't be worth the fight to keep trying against all of the threats from the market and policy makers.

Please protect our farm land and our environment from development. Please protect our rural communities and hard workers, who are good stewards of the land.

PLEASE VOTE NO!

Sincerely,

Cully Stafford
