

Dear Representatives

As your constituent in Salem Oregon I Urge you NOT to support HB 3063. I am NOT an Anti-vaxer, It's not about Vaccine effectiveness or supposed side effect, but the right to our bodies and our children's bodies and what goes in them or out of them, if you have Pro-choice of your body to have an abortion to terminate a living thing inside of you then you have the choice to not have a forced medical treatment. Taking away the rights to choice what goes in our bodies and our children's bodies is not the answer!

What are the odds of someone getting all the diseases there's vaccines for?

How many are fatal or not treatable?

What if a child is injured from a vaccine, who's liable?

Thank you

Matt Burroughs
