Subject: SB103

Importance: High

Dear Senate Committee on Environment and Natural Resources Members -

As a farmer myself, I am writing today in support of SB103.

Oregon needs a moratorium on mega-dairies in OR, especially considering the absolute fiasco of Lost Valley!

As Oregonians, we are better than this! Mega-dairies like Lost Valley put our precious resources in harms way. The devastating impact on the health of our communities, their drinking water and the environment are far too great a price to pay to look away and allow mega-dairies and their harmful practices to continue.

We are all "downstream" so to speak and we need the Legislature to act now on this important issue!
