

Dear Oregon Legislators;

My name is Virginia Farver and I live in Fort Collins, CO. I'm requesting that you put my information into the exhibits for SB 281 - SB 282 - SB 283. Thank-you for allowing these Bills to hopefully go forward through these committees. I'm working in Colorado with groups trying to pass similar Bills.,

I lost my beautiful young son Rich, on October 11, 2008 from GBM Brain Cancer. Rich was also a student on the SDSU San Diego Campus and involved in a 'Brain Cancer Cluster.' Four men who all worked in Nasatir Hall, Room 131, were diagnosed with brain cancers in 2008. In November of 2009 Ms. Laurel Amtower was diagnosed with GBM brain cancer who also worked in this area of campus. Laurel passed away on August 29, 2010 nine months after diagnosis at the age of 44. Laurel left behind a 12 year old daughter. There have also been other deaths since the original 2009 articles.

There is a cell tower on campus called HPWREN (High Performance Wireless Research & Educational Network) a backbone node to the UCSD Supercomputer Center in San Diego. HPWREN is also mission control for SDG&E. I have attached a picture of the HPWREN cell tower and please notice the dead tree foliage on the surrounding trees. Nasatir Hall, room 131 would be located approximately 200' down on the left in the picture. This is why I'm in the film 'Take Back Your Power' <https://www.takebackyourpower.net...>

[Take Back Your Power | An award-winning documentary by Josh del Sol](#)

The award-winning documentary Take Back Your Power uncovers the shocking story behind why hundreds of local governments are standing against the multi-billion dollar rollout of 'smart' utility meters. Take a journey of revelation, examining evidence of in-home privacy invasions, systemic over-billing, extortion, health & environmental harm, fires and unprecedented hacking vulnerability.

www.takebackyourpower.net

This is a film about an investigation into the smart grid and meters. It has won numerous awards.

Author Katie Singer also wrote a book for me titled 'An Electronic Silent Spring' www.anelectronicsilentspring.com. Frank Clegg the former head of Microsoft Canada has endorsed this book. More recently, Orlean Koehle updated her book 'Whoa Nellie - 5G Dangers and Deception of Powerful, New Wireless Technology' for 2019. It also has my son's story embedded within. Orlean is the head of the Eagle Forum out of California. It can be found on www.booksfortruth.com...

[Books For Truth | Turn the Helm](#)

Orlean Koehle grew up on a farm in Roberts, Idaho (near Idaho Falls). She graduated from Idaho Falls High School, served as Miss Idaho Falls, and after graduating from college, taught school at a junior high in Idaho Falls.

www.booksfortruth.com

The SDSU School Spokesman in the 2009 articles mentions that a cell tower and a garbage facility was in question, concerning this brain cancer cluster. Greg Block (spokesman) mentioned that this cell tower was installed in 2005. I actually have pictures of it being installed December 18, 2002. In 2002 HPWREN was a

distance record holder at 72 miles in all directions. There had been numerous complaints about illegal emissions:

<https://www.qsl.net/kb9mwr/projects/wireless/72mi.txt...>

www.qsl.net

<http://www.computerworld.com/mobiletopics/mobile/story/0,10801,75830,00.html> San Diego wireless net installs 72-mile, 2.4-GHz link By Bob Brewin NOVEMBER 12, 2002 ...

www.qsl.net

Please scroll through this link to pages 72- 102. The engineers are talking about HPWREN and the illegal emissions. There are a lot of repeats in these communications, but it is very telling:

https://www.qsl.net/n9zia/tapr_psr/ss.0211.txt...

www.qsl.net

The=20 problem with extrapolating from ARCi's equipment is that the base = equipment was=20 from Vyyo, whose technology wasn't "pure" DOCSIS but rather what they = called=20 DOCSIS+.

UCSD BREAST CANCER CLUSTER:

This cancer cluster was announced in 2009. 15 people, 8 women diagnosed with breast cancers from 2000-2006. All of these people worked in one office in the Literature building on campus. The UCSD Administration hired Dr. Leeka Kheifets who works for the "Electrical Power Research Institute" to head the investigation into this breast cancer cluster. Dr. Kheifets has also testified in Maine and in Arizona that smart meter radiation is safe. I have attached the 'Confidential Report.' On page 4 is a list of victims and types of cancers. On page 27 (near the top) is a thank-you to Jim Turman from SDG&E for his investigations into the EMF's within this building/room. High levels of EMR Dirty Electricity was found throughout this building/room. This particular office was up against an old elevator and the electrical equipment room for the whole building.

Nothing was done in 2009 so in 2016 another young gal (34), was diagnosed with an aggressive form of breast cancer. I have attached the 2016 Resolution by faculty and staff. The Literature building is now closed.

KELLY ELEMENTARY CANCER CLUSTER - CARLSBAD:

This cancer cluster was announced in 2010. The same two epidemiologists Dr. Thomas Mack, Dr. Raymond Neutra wrote the report for Kelly Elementary. They also wrote the report for SDSU. Epidemiological reports are bogus statistical reports. All of these cancer clusters deserved Toxicology Studies/Reports. There are huge high tension power-lines that cross with 439' of the center of this school. I will send you the report if you request. Upon further research in 2013, there were 59 cell towers and 219 antennas within a 4 mile radius of this school. This toxin x's any other toxin may as well be 1x1- 1,000.

LA QUINTA MIDDLE SCHOOL (NEAR PALM SPRINGS) CANCER CLUSTERS:

The first cancer cluster was announced in 2004. Dr. Sam Milham an EMR Expert (also in the TBYP film) did testing at the La Quinta Middle School and found high levels of EMR Dirty Electricity throughout the school. The school district in 2004 threatened Sam with litigation, so he backed off. Another cancer cluster was announced in 2015. This is exactly what Dr. Milham feared. Both Ellie Marks and Dr. Milham got involved again in 2015. Ellie Marks is the head of the California Brain Tumor Association. Both Ellie and Sam estimated around 50-100 new cancer cases since 2004. All of this preventable! Many of these kids are now young adults, fighting for their lives.

WESTON ELEMENTARY - RIPON SCHOOL DISTRICT:

This cancer cluster was announced in 2017. Just last week another announcement was made about more kids being diagnosed with cancers. Teachers are also under this assault! There is a cell tower that was installed in 2009 right beside some of the class rooms. Parents are now taking their kids out of this school, until the cell tower is removed.

ROCKY MOUNTAIN HIGH SCHOOL - FORT COLLINS, CO (where I live):

This cancer cluster was announced about 2 weeks ago. There is a cell tower directly behind this school near the track/football fields. This cell tower is located very close to many of these class rooms:

[https://Denver.cbslocal.com/2019/03/04/rocky-mountain-high-students-cancer/...](https://Denver.cbslocal.com/2019/03/04/rocky-mountain-high-students-cancer/)

[6 Students At 1 High School Battle Cancer: 'Affected Our School So Deeply'](#)

The Rocky Mountain High School student body is coming together to find a cure for cancer after six of their students were diagnosed with the disease in the past two years.
denver.cbslocal.com

We are going to lose our kids at staggering rates if this is not stopped. The NTP (National Toxicology Program) Study was released in its entirety in 2018. This was a ten year, 25 million \$ dollar study by our Federal Government. The findings within conclude that there is 'Clear Evidence of Harm by Wireless Radiation.' There is sufficient evidence to reclassify anything wireless to a Class 1 Carcinogen. This is the same category as benzene or asbestos. Lloyds of London, RE Swiss and other insurance underwriters have never, nor will they ever insure the wireless industry.

I know what it is like to lose a child. There is NO amount of money or power, that will ever make me whole again. All I want is my son back in my life! That is something no one can do for me. I do not want to see any other parent or anyone, be harmed by this ever proliferating radiation. My first thought in the morning is of my son and the last thought at night is about my son. I've cried more tears than anyone could imagine. Our kids are our future and we are killing them.

Rich had daily nose bleeds, headaches, nausea, skin rashes, underarm sweating (his endocrine system trying to cool his internal organs down), fatigue and memory or concentration problems. Rich was applying for law schools in the California area during this time. He would call home and tell me that he "could not remember things." He felt like he would disappoint me because even if he got into law school, he wouldn't make it through. It is time to get our medical doctors educated on these symptoms. Rich also had panic attacks, which is a form of depression. Depression is one of the first symptoms of wireless over exposures. How many kids are being medicated with anti-depressants wrongfully.

Dr. Sam Milham has testified in Arizona with Mr. Paul Harding about smart meters. Dr. Milham has also been working closely with the CDC. The flu used to be a seasonal event and now it is a year round event. It is because of the proliferation of wireless. Another reason to protect our kids!

Please pass SB 281/ SB 282 / SB 283 and put a hold on all 5G Small Cell DAS Antennas within Oregon. People all across Colorado are watching to see what Oregon does with 5G. We don't need local control back, we need a moratorium on 5G nationwide. Senator Eshoo and Senator Blumenthal are both demanding that the FCC prove 5G is safe. It may be your own lives or the lives of your kids, that you may be saving. Please join Senator Eshoo and Senator Blumenthal in their efforts!

Sincerely,
Virginia Farver
