

Hello,

I sat through the hearing today in Public Room E for HB 3338 and was shocked at the language being employed by students to justify disarming their campus police.

Their entire argument was based on the false presumption of all cops are racist and target minorities with violence. It just isn't true. America is not a racist nation and these kids don't have targets on their backs.

To watch the state representatives sit there in silence - while these kids pushed this marxist social justice initiative not based in reality - was disheartening.

The only people in the room making any sense were the police and the students from various intersections who supported armed police - because that's exactly WHY we have cops. To stop the bad guys that most folks are not trained to deal with.

Now that's common sense. Keep those campus police armed or watch crims on campus go up. Anyone voting to support this Bill is endorsing the idea that America and the police in it are inherently racist. The fact is they're not!

Thank you,

Joey Nations
