

Dear Chair Barker,

As a owner of a business (Car Dealership) that employees over 70 people this legislation combined with all the other recent increases in my property taxes due to bond measures, the privilege tax that only affects our industry and has caused a drop in sales, increased other federal and state taxes, minimum wage, sick leave, gas taxes, cost for other services like security that have doubled due to minimum wages, etc.....This is not something that should be shoved on the backs of small businesses.

Sincerely,

Bess Wills
