

Dear Representative,

I am a concerned Oregon parent. I ask you to vote no on House Bill 3063 that would eliminate all non-medical exemptions to vaccination. It is important to my family that we be able to decline or delay vaccinations and that my children still be able to attend school. Several members of my family have had severe reactions to vaccinations as well as other pharmaceuticals. I have concerns about the number and frequency of the current vaccine schedule as well as the growing list of future vaccines. My families health decisions should be made between me and our doctor without the added burden of or fear that my child will not be able to get a quality education. My family is too important to allow legislator make decisions about the health and well being of my family. Holding a child's right to education hostage is wrong. I ask that you vote no on House Bill 3063.
