

Hello,

This email is in response to the House Bill 3031. I am against this bill because as a local small seasonal business owner, this bill could potentially devastate my business by the loss of production. The reason that this would be so devastating to my company is because a large majority of our work season is 32 weeks in its own. As a company that employs 6 people or less, losing 1 employee for an entire season and being forced to hold their position would ensure my company to lose business and revenue.

I would like to see this bill dismissed.

Thank You

Carl Gilchrist
