Subject: yes for the forest carbon incentives bill
Date: Sunday, March 24, 2019 11:26:02 PM

As a voter and resident on the Oregon Coast, I request that you approve the forest carbon incentives bill. This massive clear cutting and subsequent spraying is not good for us, for our forests or for the animals that live in the forests.

This new bill will help in two ways: it will be a deterrent to the logging industry plus a portion of the additional taxes received are earmarked for environmental causes. I can not think of any valid reason why the big logging companies should be given a tax break or encouraged in any way.

thank you for your help.
