To Whom It May Concern:

I highly encourage a YES vote on SB801. Children that are taught the safe handling and respect of a firearm is a necessity. Back in the 1950's children were taught firearm safety in school, many schools even had ranges in the hall for .22 caliber practice. These children, then went on to teach their children firearm safety because they had been taught how important it was. Somewhere down the line the communication was broken and now we have children who do not know how to respect a firearm. Children now days play these first person shooter games with no consequences for actions on them, thinking that they can just wait and reset after getting killed or killing someone on the games. When in real life, the consequences are much more dire.

The importance of the Safe handling and respect of a firearm can not be overstated! Please vote YES on SB801.

Thank you
