

OOPS, I meant to say that I SUPPORT SB 283, which would support more safety with wireless and schools!!!

This is to voice my opposition to SB 283. As a public health researcher of over 30 years, my opposition is based on: 1) first and foremost, the potential radiation health threats of 5g technology to Oregonians; and 2) the fact that 5g towers are already being installed by public utility companies without adequate citizen input or other government oversight or review.

Sincerely,

Brenda C. Kluhsman, PhD
