

Dear Committee Member,

I am greatly concerned with what is taking place in our state. The naive gun-control supporters are trying to take our rights, guns and even allow our lives to be taken. Yes, the loss of life of the law abiding citizens is the end result!

The gun-control advocates will try and erode the rights gradually and they hope to eventually get to removing guns from the people. They will continue to pass laws to make them feel like they are doing good. The problem is the law abiding people are the only ones that obey the laws (surprise)! The end result is the law abiding end up giving up their guns (or locking them up so they can't access them in an emergency) and then the bad guys with guns come knocking... the good guys either don't have their guns or have to ask the bad guys to wait 5 minutes for them to get their guns from their gun safe... too late! Bad guys have now killed the law abiding peoples family... Their blood be upon you people with good intentions passing these ridiculous laws.

Regards,  
Richard Canifax
