

I oppose Bill HB 3063. Have you read the toxins in all of these shots and then look up the recommended amount children should be exposed to? It's way above the limit and this is why there are so many children sick! It should be the parent's decision if they want to vaccinate their children. If this bill passes our rights for doing what we know is best for our children is taken away. It's one of the worst things you can do to a parent. To make them do something that they think is harmful to their children. There is so much coverup of how much these toxins affect us and the CDC will not be held responsible. This is ridiculous. Children die from vaccinations. Why do we have the highest rate of vaccinations and the highest rate of autism?

My Family has a lot of health issues and I was diagnosed with Aspergers when I was 21. I don't want my fault to be my children's fault. Also when I was a child we had far fewer immunizations and the list keeps getting longer and longer. If this continues America is going to be very very sick. But I guess it's good for the health industry because they only get paid when people are sick.
