

Hello, my name is Gische Spencer, and I live in Eugene, Oregon. I want to let you know that I oppose House Bill 3063.

This bill is unconstitutional and goes against American freedom.

Vaccine injuries are real and not rare. My sister suffered seizures hours after receiving the MMR vaccine as a toddler, she had to relearn to walk and talk and now suffers debilitating health issues. I am simply unwilling to take that risk on my children when I have a family history of adverse reaction. This bill would remove the opportunity for my children to receive a proper education. When there is a risk, there must be a choice. It is irresponsible of the elected leaders to mandate something upon our children that has such risk involved.

Vote NO.

Thank you!
