

Hello,

My name is Kayla Leonard and I am married to Matthew Leonard. We have two healthy thriving children. We are homeowners, business owners and have been calling Oregon home for three years. Recently I have felt so sad for the potential future of not only this state but our whole country.

Money has polluted and corrupted the very government that is meant to serve us.

HB3063 is ethically wrong because:

1. Medical decisions should be made in the privacy of a doctor's office, not in state legislature.
2. We respect + value religious freedom and do not want to abolish freedoms for any reason.
3. We want all children to have access to education--and this bill takes that away from children. Our children may not even attend on-line school the way the bill is written now, even if they are missing just one vaccine.
4. It is a terrible idea to try to coerce parents into one-size-fits-all. Medicine is never one size fits all.
5. Lastly because there is no emergency in Oregon which would justify this kind of forced medical intervention!!!

Please vote NO on HB3063

We all want the best for our children, please don't take away options/opportunities for our children when they have done no wrong.

My sweet children deserve to be able to attend their Charter schools, play sports, go to camps, etc. Please remember what America was founded on and our constitutional rights.

Sincerely,

Kayla and Matthew Leonard
Applegate, Oregon
