

House Healthcare Committee Members,

I am writing to ask you all to please vote "No" on HB 3063. I am not anti-vaccinations by any means. I am a mother of 3 young daughters who are all up to date on their current vaccinations. However, I also believe in medical freedom, religious freedom, and parental rights, all of which would be violated by this bill.

I do not even have a problem with certain vaccines being required to attend public schools or other daycare facilities, but this bill is far over-reaching. It concerns me that if this bill passes, future vaccines can be added to the mandate that I as a parent may disagree with and would have no ability to decline. I also believe that exemptions should be available, which this bill does not allow.

Please stand up and protect the constitution by voting "No" on this bill.

Thank you for your time,
Laura Flores
