

Hello,

I am a resident of Oregon and a mother of 2 children ( both of whom are vaccinated). I ask you to vote no on the bill HB3063, I am personally not anti vaccine, but I am against government enforced medical interventions.

I have spent over 20 years doing research in regards to my healing myself from a chronic and autoimmune illness, and throughout these years I have met many families that have vaccine damaged children, in varying severity including death.. All children are not the same, we have different epigenetic, toxic loads, mutations, and susceptibility to the adjuvants that are added to the vaccines, including aluminum which is a known neurotoxin. We are subjecting our children to 4,5,7 even 10 of these shots at a time, It is too much.

I ask you to please read the vaccine inserts and find research and studies that are NOT backed by the pharmaceutical companies that have NO liability to any damage that may be caused. The government has paid over 4 Billion dollars in vaccine damages.

Please allow parents to make their own informed decision to their child's needs and not the US government

Ethical medicine requires completely voluntary and fully informed consent as supported by the Nuremberg code

Thank you
