

Hello Representatives,

I am emailing you to request you vote NO on HB3063. I have a 3 year old daughter and although she has some of her vaccines my wife and I have chosen to avoid a few that just don't make sense. I am not going to spout off all the statistics on vaccine Safety of efficacy. There are some vaccines that have ingredients that as a father and a Christian I cannot condone. I can say that I am old enough to remember how I obtained chickenpox as a Child and now have lifelong immunity. I plan to have my daughter contract them the same way rather than getting shots multiple times over her life to achieve similar results. There are enough toxins out there that harm our children, and I don't intend to fill her full of even more heavy metals. If this bill passes I will be forced to move from my home in Oregon. I was Born in Portland and I would like to live out the rest of my life here. But if my child is refused an education because she is not fully vaccinated, I will be forced to move my family and my business out of state. I strongly OPPOSE this bill as I feel it infringes on our rights that this country was founded on. My daughter has the right to a good education, and this bill refuses her that right!

Regards
