

Just search "autism rate in California since mandatory vaccinations"

Please note that Autism rates have increase by as much as 17%, do a simple search on google and you will find many\multiple myriad examples and reference to this FACT.

Quote from Google when searching on this:

"According to new statistics, autism rates in California have exploded since the introduction of the mandatory vaccine bill... Following the introduction of the controversial SB277 bill, signed by Governor Jerry Brown, autism rates have risen a staggering **17%**."

That alone should tell you something, HB3063 will lead us down the same path....

I implore you at least put a provision in to HB3063 that exempts families that already have children with Autism, not just kids on Chemo need exemption, but other at risk groups do too! I have 3 of 4 sons with Autism they got after the MMR, I do not want to risk my 4th son! Please vote no on HB3063! My wife their mother has autoimmune disease, this is another reason to add to potentials for medical exemption, not just what the child is diagnosed with him or herself, family history of Autism, or autoimmune disorders in family history should apply not just what the child him or herself have been diagnosed with.

Paul Ramirez resident of Oregon

1-562-440-2131 Moved from California to AVIOD draconian SB277, now my children are threatened by HB3063 the very reason I uprooted my whole family from California... Please vote NO and if you don't add Autistic families to the exemption list!
