

House Health Care Committee Members –

I am asking you to please NOT schedule a public hearing for HB 3063 and to oppose any mandatory vaccination bills. There are so many families that choose to decline certain vaccines or do an alternated schedule for specific health reasons and these choices should not inhibit a child's right to attend school. The right to education is legally guaranteed for all without discrimination in our country and we are thankful for this! Upon research, our personal experience and personal knowledge of friends & family who struggle with autoimmune diseases and/or genetic disorders have been told by their geneticists, endocrinologists, rheumatologists, etc. to stop vaccinations because they do not know the interactions that could exacerbate the unknown issues in their children.

In addition to medical issues with genetic complications, our country was founded religious freedoms and this bill would tread on these rights by not allowing parents to opt out of vaccines that have ingredients or ingredients sourced in ways that go against core religious beliefs.

Taking away Education rights and Religious freedoms, founding principles of our country, are not the way to solve this issue.

Thank you for taking the time to hear our voices and taking into consideration these requests.

Sincerely,

Tamara Donovan  
Oregon registered voter
