

To Chair Monnes-Anderson & Committee Members:

I am writing in support of SB 770, I believe that Health care is important for all. Oregon citizens, including myself, would want to feel that they are able to receive the medical care they need w/o major concerns of expensive costs. I don't really understand where the USA began to lose interest in the "regular person" by not supporting individuals to help live a fuller life. At one time, people w jobs were able to get this needed coverage through their jobs. Now deductibles are as high as \$5,000 for a family of four. Let's do the right thing & help working families have secure medical coverage. Thank you,
Valerie Keys
