

To Chair Monnes-Anderson and Committee Members:

Support efforts for Single Payer by supporting SB 770

My life is a testimony to the wisdom of our government providing for the health and welfare of ALL our citizens.

I was born 8 months after my father died. My mother and father had had two older children, as well. Social Security had been enacted just 13 years before, but it helped provide for a widow and three children. I and my two siblings went on to graduate from college, receive advanced degrees, and make positive contributions to society throughout our lives.

Do not abandon those in need. Make sure ALL Oregonians have access to health care. Assure our citizens can thrive and prosper and they will repay society, just as I and my siblings have.

Jean Culp and husband John Culp
