

In Support of SB770:

Consider that without health, one is unable to work or be an asset to the community.

We must have universal healthcare in order to be a productive society.

The major reason for bankruptcy is medical bills. This is so unfair and uncivilized!

It negates our efforts to support ourselves and our families. It causes tragedy on top of tragedy.

We must work for the common good; we must assure all inhabitants of our country the right to healthcare.

Every other positive act stems from having medical care without worry.

Thank you,

Susan Haywood
