---

HB 2020 – This legislation is unnecessary at the state level. It places regulation where none is needed. It's a tax and the people should get a vote on any tax.

I'm a retired senior citizen (68 years old) and won't be able to maintain my standard of living. It will place an undue hardship by raising utility costs. Fuel, home renovations necessary to meet your proposed fuel usage standards. I heat & cool my home by using natural gas and HB2020 legislation would make it necessary to spend money I don't have.

Sincerely

Steve Gallay
