

Dear Oregon Legislature,

There are several points that are concerning:

1. Why is this an emergency?
2. Why are you pushing this through legislation under such short notice so the public can not attend the hearings?
3. Is this a backdoor bill to force vaccines as under HB3063 you are not listening to our concerns?
4. Why does the State of Oregon believe you have the right to dictate our healthcare? We are not a communist society.
5. Why are you not taking your time to explore further options? You are all acting like our President with knee jerk reactions without looking at the facts and getting the input of your constituents that put you in office in the first place.
6. Our State is in a budgetary emergency, why would the State want to take on even more budget demands when we can't even educate our children up to the standards they deserve and many states surpass?
7. Health plans are personal. Not the job of the State to dictate? Will you then take away my corporate health plan as your plan is better? And what if I don't want to use your plan? Is your overall plan to dictate healthcare to all Oregonians and what gives you that right without letting the people vote on that issue? Did not realize Oregon was a state of dictatorship and communism.

You may have what you believe to be the best intentions at heart, however; the Bill is written giving way to much authority to unknowns.

I would appreciate a response to my questions/concerns.

Best, Suzanne Monaco

Bend, OR
