

Rebecca Roth

VOTE NO **SB 978**

No matter how tricky of a process you believe you can engage in and still consider yourselves “the representatives of the people,” there is no process in which you have the intention to remove the right of people to defend their lives and the lives of others in their care and still go home with a clean conscience

When you make it difficult for law-abiding people to acquire a gun, or to be able to use a gun to defend their lives, you set up the conditions that dictators like the Democrats of years past wanted for their slaves, and later for the freed slaves,—a system of denial of god-given rights that was known as, “the Jim Crow laws,” which made it possible to have total control over the lives, and especially the untimely deaths, of people Democrats in the southern states had *decided needed to be killed*. *Often the killing was done by thugs who would attack unarmed people, and justice would look the other way*. The Democrats proudly displayed their prowess in attacking unarmed people by dressing in strange white costumes and marching in parades—openly letting everyone know how powerful they were, and how much to be feared.

Even without their costumes there might still be Democrats who are willing to pay for “gun control” for citizens, leaving us defenseless to the same sorts of thugs who will still be able to get illegal guns—because criminals, by definition do not obey they law.

When you represent Democrats who give you money, like Mr. Bloomberg is doing, have you asked the question, “Is he doing like the Democrats of old would have done in their attempt to keep slaves unarmed and defenseless to any conditions or destructive actions of slave catchers, or slave abusers?” Mr. Bloomberg’s money is buying the destruction of god-given rights that you are sworn to defend.

Do not think that you have any true authority to do this. True authority does not deny law-abiding citizens of our great nation the ability to defend our lives, whether white, black, or Republican.
