

**HB 2133 STAFF MEASURE SUMMARY**

**House Committee On Revenue**

---

**Prepared By:** Kyle Easton, Economist

**Meeting Dates:** 4/4

---

**WHAT THE MEASURE DOES:**

Extends to January 1, 2026, sunset of personal income tax credit available to individuals aged 62 years or older that receive certain taxable retirement income.

**ISSUES DISCUSSED:**

**EFFECT OF AMENDMENT:**

No amendment.

**BACKGROUND:**

Enacted in 2001, individuals aged 62 years or older that receive certain taxable retirement income may qualify for a tax credit equal to nine percent of their qualified net pension income. For purposes of tax credit, qualified pension income means income included in Oregon taxable income from: an employee pension benefit plan, employee annuity accounts, deferred compensation plans, individual retirement accounts, and federal/state/local public retirement system.

Net pension income qualifying for the credit is limited to \$7,500 (\$15,000 joint return) minus Social Security benefits minus household income over \$15,000 (\$30,000 joint). These two limitations effectively cause the credit to phaseout potentially with each additional dollar of Social Security income received or with each additional dollar of pension income above \$15,000 (\$30,000 joint).
