

I am an Oregon voter, zip code 97227. I urge the committee to pass SB 870 through to the full Senate. As the electoral college is currently set up, swing states get much more attention than states such as Oregon. All votes in all 50 states should count!

It is a misconception that under a National Popular Vote certain areas would decide the election. In fact that's what happens now and National Popular Vote fixes this inequality by making every voter matter and replacing swing states with a swing United States of America.
