Subject: SB931 and SB926

I'd like to encourage you to support **SB931** and **SB926**.

- SB931 is a common sense measure that updates the monitoring and reporting system used by the Oregon Department of Forestry, the FERNS notification system, & calls for corporations to be better neighbors.
- SB926 requests our state to ban aerial spraying on state public lands just as the Federal Public Lands banned this practice decades ago in the interest of public health and safety. Oregon's Public Forestlands are important sources of drinking water for many communities, homes and schools.

Thank you.

Sincerely,

Elizabeth Waldron, MD
