

Senators: I oppose SB 978 on the grounds that it is a violation and infringement of the second amendment. This bill is just a witch hunt looking for more ways to demonize law abiding gun owners, who have passed background checks, paid fees for concealed permits, been through more background checks for those concealed permits. Supporters of SB978 need to focus on criminals and criminal activity, instead this tyrannical activity of going after good gun owners. As for the storage of firearms, it is unconstitutional to require people to lock-up fire arms. In some situations a locked-up firearm might get you killed. Lets look at the airport parking lot scenario: Criminal element attempts to car jack you or rob you in the parking lot. But your gun is locked up: your car is now gone and firearm also. Or your dead. This draconian bill also have provisions banning knives, clubs, and other devices one might use to protect oneself, or are we just lambs for slaughter. As stated before, concealed gun owners have been vetted, paid their dues and have some training in active shooter events. In fact, a concealed armed citizen may just save your life or your children's life someday, either at schools, airport, playground or even at the mall.

More unconstitutional language infringing on the second amendment. Banning of 80 percent parts. I call them parts because the BATF defined them as NOT firearms, just a block of metal or blank of plastic. There is no real evidence that these are used in crime as they require time and expertise. Criminals take the easy path, steal weapons, or black market. (look at fast and furious, hundred of arms from Mexico into United States market) . This part of SB978 smells like more demonization of law abiding gun owners.

I am not in favor of age restrictions. If your 18 year old is old enough to enlist in the armed forces, serve and possibly die for his or her country. Why should they be restricted from gun ownership if they meet the background check. Again the author and sponsors exercising their hatred and disdain for firearms, gun owners and the right to protect LIFE and LIBERTIES. The proposed legislation is not about real gun safety, it about tyrannical rule of all firearms owners.

For the record:
