I am encouraging you to oppose SB885. I have applied for raising canola several years. Allowed one year, blocked the rest. I liked raising canola, it is a good rotational crop. It helped with weed control. The non-GMO was easily marketed at Rickreall Oregon.

We have invested in scientific research at OSU showing canola to be a viable crop. It can fit into our farming practices. We do not need more regulations on this crop.

Please oppose SB885. Thank You.
