Subject: SB 931

Dear Legislators:

Please approve SB 931 to require strict notice of aerial spraying above forest lands in the FERNS database. If we cannot yet produce, as we should, an outright ban all such spraying, at the very least we should ensure notification of nearby residents as a stop-gap measure.

Let us look forward to the day when such spraying—with its toxic drift, damage, and pollution—will be prohibited across all the geography of our state.
