

"We The People" hereby tell you legislators that work for us, courtesy of my tax dollars...we will not comply. We are sick and tired of your overreach and refuse to allow you to license law abiding citizens. It's this type of nonsense that led to the first civil war and you are fast tracking this country down that same path.

We will not comply - period. It's time you wake up and realize this country will not stand by peacefully and be run over by your ineptness and corrupt overreach.

The US Constitution speaks for itself - anything you think can add or subtract from that document is utter garbage, does not supersede federal laws, and anybody supporting these bills should be removed from office.

It's our US Constitutional right to carry a firearm - concealed or open - period.
