

Senate Rules Committee -

I urge your support for SB870, The National Popular Vote Interstate Compact bill. I believe our president should be elected the same as every other office holder - one person, one vote. The Electoral College is an anachronism that should be replaced by the national popular vote. Each person would have an equal impact on the election of our president. Individuals, not their location, would impact the vote for president.

Please vote yes on SB 870.

Thank you.
