Subject: SB 931

Modernizing FERNS in SB 931 is so important. My 9 neighbors and myself along a 7 mile stretch of 2 roads in the Jewell of Clatsop County live next to and get their water from springs on Industrial Forest lands or adjacent to them. We need to protect ourselves and our livestock in a timely fashion from toxic sprays. Many more individuals live in rural and coastal areas that are impacted by toxic sprays. This is a list of 2019 Chemical(s) that may be used: 2,4-D with choline, atrazine, clopyralid, glyphosate, hexa zinone, triclopyr with ester Chemical Carrier(s): water, Forest Crop Oil Chemical Additive(s): Crosshair, MSO.

Please help us protect us from the harms of toxic spraying and pass HB 931
