Subject: SB 926

I'm writing to voice my strong support of SB 926, which would stop aerial spraying over state owned forest lands and ask that this measure be passed, approved, and enacted this legislative session. Aerial spraying of poisonous chemicals continues on state lands and at a significantly increased pace over previous years, with families (especially those in rural areas of the state) continuing to be sickened and our wildlife, streams and crops that constitute our food supply contaminated by these sprays.

Thank you to the sponsors and Committee for advancing this Bill to better ensure the health and well-being of all Oregonians.

Sincerely,
Brenda C. Kluhsman, PhD
