Subject: Stop All use of Roundup and Aerial Spraying of Pesticides

SB 926 would stop aerial spraying over state owned forest lands.

SB 931 would require better notification and reporting of sprays in the FERNS public database.

Additionally we need to stop all use of these pesticides, not just aerial spaying but all usage in the entire state. Hawaii did this two years ago so they can sell there pineapples to Europe and Japan. We need to follow them.

Sincerely,

Victor Odlivak
