Dear Legislators,

I am encouraged to see that you are about to end the practice of aerial spraying on our state forest lands. This practice is diabolical. It goes against all common sense. Spraying poisons on our Mother Earth is unconscienceable!!! The reason for spraying is the equally diabolical practice of clear cutting. Haven't we learned anything from history? Destroy your habitat and you destroy your civilization.

The Romans clear cut Lebanon and created a desert.

Please! The lives of future generations are in your hands!!!!!!

Choose wisely

Sincerely,

Ann Odean
