

Time after time, for 10 years, the house has passed a bill which would add Oregon to the growing number of states signing on to an interstate compact which, when it goes into effect, will ensure that every vote in a presidential election counts. (National Popular Vote)

And time after time, for 10 years, the senate has let the bill die in committee.

Oregon could have been a leader in the endeavor. We already know the majority of Oregon citizens supports this proposal.

Please stop dithering around and let the full senate vote on SB 870. The time has come. Stop using excuses to delay yet again ... and let the senate vote!
