Dear Joint Committee on Carbon Reduction Submitting to Committee,

Oregon has the opportunity take a bold step in the fight against climate change. House Bill 2020, the Clean Energy Jobs bill, is an exciting proposal. It has the potential to drive down statewide climate pollution and invest in communities across the state-- leading to clean energy strategies that create jobs, support clean air and healthy forests, and focus resources in communities most impacted by climate change including communities of color and low-income communities.

Please support the recent amendments to the bill which:

- Hold large polluters accountable
- Invest in clean energy projects in communities across the state, and
- Ensure that a majority of investments benefit the communities most impacted by climate change.

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.

Dear Joint Committee on Carbon Reduction Submitting to Committee,

Oregon has the opportunity take a bold step in the fight against climate change. House Bill 2020, the Clean Energy Jobs bill, is an exciting proposal. It has the potential to drive down statewide climate pollution and invest in communities across the state-- leading to clean energy strategies that create jobs, support clean air and healthy forests, and focus resources in communities most impacted by climate change including communities of color and low-income communities.

Please support the recent amendments to the bill which:

- Hold large polluters accountable
- Invest in clean energy projects in communities across the state, and
- Ensure that a majority of investments benefit the communities most impacted by climate change.

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.

Regards,  
Sue Hartford  
3580 Thomsen Rd  
Hood River, OR 97031

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.

I would go further---let's be on a fast road to Net Zero Carbon emissions with tightening laws on mandatory building efficiency and device and appliance efficiency, transition to and support of regenerative agriculture policies that build soil and pull lots of carbon dioxide out of the sky, and mandate by % the transition to a nearly all-renewable grid and the electrification of transportation. These are the solutions that must be encouraged and gradually mandated by law and you and we supporting you need to start now with a strong Clean Energy Jobs Bill.

Thanks for all you do

Dear Joint Committee on Carbon Reduction Submitting to Committee,

With only 12 years to make or break any ability to decrease the impacts of climate change, it is clear that we have only a few chances to become flexible in our thinking and attempt to prepare so that we are not locked into only reacting to rolling catastrophes.

House Bill 2020, the Clean Energy Jobs bill, is an exciting proposal. It has the potential to drive down statewide climate pollution and invest in communities across the state-- leading to clean energy strategies that create jobs, support clean air and healthy forests, and focus resources in communities most impacted by climate change including communities of color and low-income communities.

Please support the recent amendments to the bill which:

Dear Joint Committee on Carbon Reduction Submitting to Committee,

Oregon has the opportunity take a bold step in the fight against climate change. House Bill 2020, the Clean Energy Jobs bill, is an exciting proposal. It has the potential to drive down statewide climate pollution and invest in communities across the state-- leading to clean energy strategies that create jobs, support clean air and healthy forests, and focus resources in communities most impacted by climate change including communities of color and low-income communities.

Please support the recent amendments to the bill which:

- Hold large polluters accountable
- Invest in clean energy projects in communities across the state, and
- Ensure that a majority of investments benefit the communities most impacted by climate change.

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.

- Invest in clean energy projects in communities across the state, and
- Ensure that a majority of investments benefit the communities most impacted by climate change.

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.

Dear Joint Committee on Carbon Reduction Submitting to Committee,

Oregon has the opportunity take a bold step in the fight against climate change. House Bill 2020, the Clean Energy Jobs bill, is an exciting proposal. It has the potential to drive down statewide climate pollution and invest in communities across the state-- leading to clean energy strategies that create jobs, support clean air and healthy forests, and focus resources in communities most impacted by climate change including communities of color and low-income communities.

Please support the recent amendments to the bill which:

- Hold large polluters accountable
- Invest in clean energy projects in communities across the state, and
- Ensure that a majority of investments benefit the communities most impacted by climate change.

At the same time, there should be no rollbacks to any of Oregon's existing environmental programs in the process.

Thank you for your commitment to a healthy future for Oregonians.
