Subject: SB 931

Chairman Dembrow and Vice-Chair Olsen.

As owner/manager of over 250 acres of family forestland in Clackamas County (Sen Olsen's district) I am strongly OPPOSED to this bill. It is already hard enough for us to schedule licensed aerial applicators on our forest acres undergoing reforestation. This timing of proposed notification to ODF in this bill would make it almost impossible.

SB 931 seems aimed at preventing spraying, not protecting the public interest in healthy forests and their public benefits.

Please do not allow this to become law.
